City Commission Information Letter

June 24, 2022

Direction to Advance General Obligation Bond Referendum Considerations

In response to consensus and direction offered during last month's annual goal setting session, please be advised that we've recently initiated dialogue with both the City's external financial advisor and bond counsel to discuss and outline structure and timing necessary to offer options for City Commission consideration for the potential issuance of general obligation bond referendums.

As referenced in the attached electronic mail message from Director of Finance Hugh Dunkley, guidance to this effect will involve final capital project cost estimates, as well as additional clarity regarding the "Single Purpose" rule. As some of you may recall from previous discussions and observations to this effect, the "Single Purpose" rule simply means that a referendum item may only address a single issue, for example, parks improvements.

With respective ancillary tasks and analysis currently underway, opportunities for formal consideration of approval will be offered to the City Commission publicly in the coming weeks.

Clarity Regarding License Agreements Involving External Service Providers for Youth Recreational Programming

In response to observations offered publicly during the June 7th regular meeting relative to the adverse impacts to availability of recreational facilities for ancillary youth programming activities (such as more after school and summer opportunities), my office recently convened a discussion with leadership in the Department of Parks and Recreation to further evaluate any basis for concern.

As noted in the attached electronic mail message from Assistant Director of Parks and Recreation Amy Hanson, both the Early Learning Coalition of Palm Beach County (ELC) and the Children's Services Council of Palm Beach County

City Commission Information Letter

June 24, 2022

Page 2

(CSC) have enjoyed formal relationships with the City of Delray Beach for a number of years now, involving after school and summer camp services for youth (who would otherwise not be able to enjoy such opportunities). Arrangements to this effect likewise involve participation at the Pompey Park Recreation Center, as well as a designated site at the community center located on Northwest 1st Avenue.

Annual contractual relationships with both ELC and CSC involve reimbursement to the City of Delray Beach for aforementioned programming activities. However, during the height of the pandemic, enrollment was severely impacted, with levels of participation now beginning to improve significantly.

As far as assertions that the noted services provided impact the ability of other youth to enjoy recreational facilities and related opportunities, licensed childcare portions of Pompey Park only involve the gymnasium (and its adjoining locker room and restrooms), and playground. Therefore, as administration continues to advance and offer additional programming, other areas of the complex will become accessible accordingly.

Analysis Concerning Additional Homestead Tax Exemption for Qualifying Senior Citizens

With countywide advocacy to support the Additional Homestead Tax Exemption for Qualifying Senior Citizens now reaching our community, both the Office of the City Manager and the Department of Finance recently convened to perform analysis necessary to outline considerations and impacts of participation.

As referenced in the attached electronic mail message from Director of Finance Hugh Dunkley on the subject, it has been determined that approximately 733 residents in our community would qualify for this opportunity (should the City Commission adopt a respective ordinance to authorize this exemption).

Although this benefit can be made available via either a \$50,000 or \$25,000 additional homestead exemption, most municipalities in Palm Beach County (that actually participate in this program) administer the \$25,000 benefit. A \$25,000 opportunity would therefore yield a potential ad valorem revenue reduction to the City of Delray Beach by approximately \$117,000 annually.

City Commission Information Letter

June 24, 2022

Page 3

The earliest opportunity for the City of Delray Beach to grant this benefit would be for Fiscal Year 2023-2024. As an ordinance necessary to authorize direction as outlined (for this timeframe) must be delivered to the Office of the Palm Beach County Property Appraiser no later than December 1, 2022, all involved will be more than happy to support guidance and/or interests on the part of the City Commission to do so.

Proactive Efforts to Respond to Future Environmental Protection Agency Nationwide Criteria for PFAS Levels in Drinking Water

As the United States Environment Protection Agency (EPA) has recently announced its goals to eventually revise health advisory levels and standards for PFAS from 70 parts per trillion, to nearly zero parts per trillion, please be advised that direction is being offered to incorporate infrastructure improvement efforts to help enable the Department of Utilities to proactively prepare accordingly.

As referenced in the attached announcement excerpts from EPA, phased action planning strategies have been outlined for implementation over the next couple of years, with the intention of requiring both public and private water utility operations throughout the nation to adhere to updated criteria. The City of Delray Beach will likewise now include design features to this effect for the new water treatment plant, specifically involving larger filtration systems to help meet anticipated standards.

Additionally, with future requirements anticipated, external funding opportunities to assist utility operations in advancing infrastructure systems will also become available. Both the City's federal and state lobbyist organizations have therefore been asked to actively identify specific financial support opportunities for which we may become eligible.

Calendar of Meetings, Activities, and Functions

Yesterday evening's charrette workshop provided an opportunity for both residents and stakeholders to give their input regarding the future trajectory of the Old School Square complex was well attended, yielding many thoughts and

City Commission Information Letter

June 24, 2022

Page 4

ideas for programming, infrastructure improvements, and overall use of the buildings and grounds for optimal use and enjoyment.

Both the Office of the City Manager and other involved staff will convene with Treasure Coast Regional Planning Council Executive Director Thomas Lanahan in the coming days to outline direction for a respective report compilation. An update relative to progress as noted will therefore be provided next week.

To: Terrence R. Moore
Subject: GOB Bond Issue

Mr. Moore –

Regarding our recent meeting with the Workgroup for the general obligation bonds, I just wanted to advise on some things that will be crucial for us to have to facilitate the process with an eye towards placing the bond issue on the ballot for the March 2023 election:

- We will need cost estimates for the various projects.
- Florida law requires that the City group similar measures together into separate ballot questions (the so-called “Single Purpose” Rule). As such, voters will be asked to consider more than one ballot question, given the discussions that were had during our goal-setting session. Typical examples of categories would be as follows:
 - Public Safety
 - Parks, Recreation and Leisure Activities
 - Streets, Sidewalks, Bridges and Streetscaping
- Once we have determined with some degree of certainty the projects to be financed by the bond issue, we will then seek City Commission approval to place the individual items on the ballot.
- I do foresee that we will have a good bit of public education/outreach to be done prior to the election.
- The sizing and structure of the bond issue will be determined by the Workgroup after we’ve obtained project estimates and have had the opportunity to obtain City Commission input.

Hugh B. Dunkley, CPA, CGFO

Finance Director

City of Delray Beach

Subject: License agreements involving services provided for youth programming

Good afternoon Terrence,

The City of Delray Beach has worked with the Early Learning Coalition of Palm Beach County (ELC) and the Children's Services Council of Palm Beach County (CSC) for numerous years. This relationship provides affordable youth activities in the form of after school and summer camp programming. These opportunities allow families that may otherwise find the programs cost prohibitive to participate. The locations involved in this agreement include the Pompey Park Recreation Center and a designated site at the Community Center located at 50 NW 1st Avenue. The licensed childcare portions within Pompey Park include the gymnasium and attached restrooms as well as the outside playground. All additional locations in and around the facility are available for additional programming and patron use. Due to a lack of qualified staffing and the current pandemic, the participant numbers are not at maximum capacity but continue to increase. The Pompey Park site has a maximum enrollment of 150 children and the Community Center site has a maximum of 75 as a designated site.

Below are benefits provided from the agreement with the ELC and CSC;

- Reimbursement to the City for youth participants in the after school and summer camp programs
- Reduced program rates for families participating in after school and summer camp programming
- Program staff receive free training including 45-hour childcare certification required by the Florida Department of Health
- Program staff receive additional free continued childcare education opportunities
- Free educational incoming guests and field trips that provide youth hands-on experiences in the following topics;
 - Cooking
 - Exercise, health, and wellbeing
 - Science, Technology, Engineering and Math (S.T.E.M.)
 - Drug abuse prevention
 - Bullying awareness
 - Arts and crafts
 - Animals and wildlife
 - Gymnasium, adjoining locker rooms, playground

Thank you,

Amy Hanson, C.P.R.P.
Assistant Director of Parks and Recreation
City of Delray Beach
Parks & Recreation Department
50 NW 1st Avenue
Delray Beach, FL 33444

Subject: Additional Homestead Exemption for Qualifying Senior Citizens
Attachments: Limited Income Senior Exemption for Persons 65 and Older.pdf

Mr. Moore –

Staff was able to obtain from the Property Appraiser's Office the total number of taxpayers residing within the City who are currently receiving the senior homestead exemption from the County. There are currently 733 taxpayers receiving this benefit, which would result in a potential loss of property tax revenue to the City of approximately \$117,000, assuming that the City grants an additional homestead exemption of \$25,000.

The board of county commissioners of any county or the governing body of any municipality may adopt an ordinance granting an additional homestead exemption to certain persons 65 years of age or older whose household income does not exceed a specified amount. The current income level for qualifying for the additional senior homestead exemption is \$32,561 for the 2022 exemption year. This qualifying income amount is adjusted annually by the Florida Department of Revenue.

An ordinance granting an additional homestead exemption must meet the following requirements:

- It must be adopted under the procedures for adoption of a non-emergency ordinance, pursuant to Chapter 166, F.S.
- It must specify that the exemption applies only to taxes levied by the unit of local government granting the exemption.
- It must specify the amount of the exemption.
- It must require that a taxpayer claiming the exemption for the first time submit to the Property Appraiser not later than March 1, a sworn statement of household income on a form prescribed by the Florida Department of Revenue.
- The board of county commissioners or municipal governing authority must deliver a copy of the ordinance granting the additional homestead exemption to the Property Appraiser no later than December 1 of the year prior to the year the exemption will take effect.

Of the municipalities in Palm Beach County that offer this exemption (approximately 11), most grant an exemption of \$25,000. The County also grants an exemption of \$25,000. Only 3 municipalities grant the maximum exemption of \$50,000.

Once the program is adopted by the City, the additional senior homestead exemption will be managed by the Palm Beach County Property Appraiser's Office.

Palm Beach County Property Appraiser

We Value What You Value

Limited Income Senior Citizen Exemption for Persons 65 and Older

In order for you to qualify for the following additional exemption, you must have a homestead exemption on your property.

Palm Beach County senior citizens, age 65 or older, with income below the limit set by the Florida Department of Revenue. The income limitation amount is available from our office in mid-January of each year. Based on the prior year's income, the income limit is **\$32,561** for the 2022 exemption. This does not include tax-exempt bond interest or non-taxable social security income. You will be asked to provide a copy of your Federal 1040 Tax Form or your Social Security 1099 Form.

The additional benefit for qualified seniors applies only to taxes levied by the following authorities. The county's senior exemption does not apply to other taxing authorities, such as the school district and other municipalities.

\$50,000

Town of Haverhill

Town of Loxahatchee Groves

Village of Wellington

Drinking Water Health Advisories for PFAS Fact Sheet for Public Water Systems

Overview

As part of EPA's commitment to safeguard communities from per- and polyfluoroalkyl substances (PFAS), EPA has established **interim updated lifetime drinking water health advisories** for:

- 1) PFOA (perfluorooctanoic acid); and
- 2) PFOS (perfluorooctane sulfonate).

EPA has also established **final lifetime drinking water health advisories** for:

- 3) GenX Chemicals (hexafluoropropylene oxide (HFPO) dimer acid and its ammonium salt); and
- 4) PFBS (perfluorobutane sulfonic acid and its related compound potassium perfluorobutane sulfonate).

The interim health advisories are intended to provide information to states and public water systems until the National Primary Drinking Water regulation for PFAS takes effect.

These health advisories provide drinking water system operators, and state, Tribal, and local officials who have the primary responsibility for overseeing these systems, with information on the health risks of these chemicals, so they can take the appropriate actions to protect their residents. EPA is committed to working with our co-regulators and impacted stakeholders on solutions to reduce public health risks.

Background

What Are PFAS?

PFAS are synthetic chemicals that have been manufactured and used by a broad range of industries since the 1940s. PFAS are used in many applications because of their unique physical properties such as resistance to high and low temperatures, resistance to degradation, and nonstick characteristics. PFAS have been detected worldwide in the air, soil, and water. Due to their widespread use and persistence in the environment, most people in the United States have been exposed to PFAS. There is evidence that continued exposure above specific levels to certain PFAS may cause adverse health effects.

What Are Drinking Water Health Advisories?

Drinking water health advisories provide information on contaminants that can cause human health effects and are known or anticipated to occur in drinking water. EPA's health advisories are non-enforceable and non-regulatory and provide technical information to drinking water system operators, as well as federal, state, Tribal, and local officials on health effects, analytical methodologies, and treatment technologies associated with drinking water contamination.

EPA's lifetime health advisories identify levels to protect all people, including sensitive populations and life stages, from adverse health effects resulting from a lifetime of exposure to these PFAS in drinking water. They also take into account other potential sources of exposure to these PFAS beyond drinking water (for example, food, air, consumer products, etc.), which provides an additional layer of protection.

EPA’s Health Advisories for PFOA, PFOS, GenX Chemicals, and PFBS

PFOA and PFOS

In 2016, EPA published health advisories for PFOA and PFOS based on the evidence available at that time. The science has evolved since then, and EPA is now replacing the 2016 advisories with **interim updated lifetime health advisories** for PFOA and PFOS that are based on human epidemiology studies in populations exposed to these chemicals.

Based on the new data and EPA’s draft analyses, the levels at which negative health effects could occur are much lower than previously understood when EPA issued the 2016 health advisories for PFOA and PFOS – including near zero for certain health effects. These new health advisory levels are below the levels at which analytical methods can measure PFOA and PFOS. The minimum reporting levels for measuring these contaminants are in Table 1. The EPA Science Advisory Board is reviewing EPA’s analyses, and therefore, these interim health advisory levels are subject to change. However, EPA does not anticipate changes that will result in health advisory levels that are greater than the minimum reporting levels.

GenX Chemicals and PFBS

EPA’s final lifetime health advisories for GenX chemicals and PFBS are based on final agency toxicity assessments (2021).

Summary of the Four Health Advisories

Chemical	Lifetime Health Advisory Level/Value (parts per trillion or ppt)	Minimum Reporting Level ¹ (ppt)
PFOA	0.004 (Interim)	4
PFOS	0.02 (Interim)	4
GenX Chemicals	10 (Final)	5
PFBS	2,000 (Final)	3

¹ Unregulated Contaminant Monitoring Rule (UCMR) 5 MRL is the minimum quantitation level that, with 95 percent confidence, can be achieved by capable analysts at 75 percent or more of the laboratories using a specified analytical method. These MRLs are based on the UCMR 5 requirement to use Method 533.

Recommended Actions for Drinking Water Systems

Steps to Assess Contamination

If water sampling results show the presence of PFOA, PFOS, GenX chemicals or PFBS in drinking water above the health advisory levels, EPA recommends that water systems undertake additional sampling to assess the level, scope, and localized source of contamination to inform next steps. EPA also recommends that water systems work with state authorities on this step to determine if they have state requirements or guidance on concentrations of PFOA, PFOS, GenX chemicals and/or PFBS that warrant action or concern. Drinking water systems and public health officials should also provide consumers with information about the levels of PFAS in their drinking water.

Steps to Inform

If water sampling results show the presence of PFOA, PFOS, or levels of GenX chemicals or PFBS in drinking water above the health advisory levels, water systems should notify their state drinking water safety agency (or EPA in jurisdictions for which EPA is the primary drinking water safety agency) and consult with the relevant agency on the best approach to conduct additional sampling. EPA also recommends that water systems work with state authorities to determine if they have state requirements or guidance on concentrations of PFOA,

PFOS, GenX chemicals and/or PFBS that may represent levels of concern. Drinking water systems and public health officials should continue to provide consumers with information about the levels of PFAS in their drinking water.

Steps to Limit Exposure

There are different ways to reduce risks from PFAS. In some cases, drinking water systems may be able to reduce concentrations of PFAS by closing contaminated wells or changing the rates of blending of water sources, where the available quantity of drinking water is not compromised. Systems may also remove PFAS by installing technologies such as granular activated carbon, ion exchange or high-pressure membranes. These technologies can be installed at the treatment plant, or for some smaller systems or for private wells it may be more effective to use point of use devices that have been demonstrated to remove PFAS.

Funding to Address PFAS in Drinking Water

As part of a government-wide effort to confront PFAS pollution, EPA is announcing \$1 billion in grant funding through President Biden's Bipartisan Infrastructure Law to help communities that are on the frontlines of PFAS contamination. This funding from the Emerging Contaminants in Small or Disadvantaged Communities Grant Program is the first of \$5 billion through the Bipartisan Infrastructure Law that can be used to reduce PFAS in drinking water in communities facing disproportionate impacts. EPA will be reaching out to states and territories with information on how to submit their letter of intent to participate in this grant program to EPA. EPA will also engage with Tribes and Alaskan Native Villages regarding the Tribal set-aside for this grant program. EPA will be issuing guidance later this year detailing eligible uses for the funds and providing more information on how water systems can apply to states for this funding.

This new program complements \$3.4 billion in funding that is going through the Drinking Water SRFs and \$3.2 billion through the Clean Water SRFs that can also be used to address PFAS in water this year. Water systems are encouraged to contact their state SRF programs to learn more about how to apply for funds and for eligible uses to reduce PFAS. For more information on the SRFs, including a list of state DWSRF contacts, visit:

<https://www.epa.gov/dwsrf>.

Other EPA Actions Related to PFAS and Drinking Water

As outlined in EPA's PFAS Strategic Roadmap, released in October 2021, the Agency is developing proposed National Primary Drinking Water Regulations for Perfluorooctanoic acid (PFOA) and Perfluorooctane sulfonic acid (PFOS). EPA expects to issue a proposed rule in Fall 2022 and a final rule in Fall 2023. As EPA undertakes this action, the Agency is also evaluating additional PFAS and considering actions to address groups of PFAS.

In addition, EPA's fifth Unregulated Contaminant Monitoring Rule (UCMR 5) requires monitoring for 29 PFAS between 2023 and 2025. Consistent with EPA's PFAS Strategic Roadmap, UCMR 5 will provide new data that are critically needed to improve EPA's understanding of the frequency that these PFAS are found in the nation's drinking water systems and at what levels. More information on UCMR5 is available at:

<https://www.epa.gov/dwucmr/fifth-unregulated-contaminant-monitoring-rule>
