# The Beauty of Water

## Art by Lee Berlin

August 29 - October 30

2nd Floor Gallery

Opening just in time for Delray's Climate & Art 2022 weekend of events, come and experience water-themed art by our own art gallery coordinator, Lee Berlin.

Of this body of work, Lee said:

"Many people view the ocean as a calming force. And while that can of course be true, for me the ocean is exciting. It's a vibrant, natural masterpiece bursting with life and color. I hope that comes through with these pieces. Whether it's marlins cresting the surface, surfers bursting from the waves, or an abstract sunrise, I hope viewers are left with a sense of joy and playfulness. And with a color palette that turns up the dial on reality, hopefully they'll get a sense of what I feel when I look out at the vast and wondrous oceans of the world."
