

City of Delray Beach General Employees' Retirement Plan

ACTUARIAL VALUATION REPORT
AS OF OCTOBER 1, 2021

ANNUAL EMPLOYER CONTRIBUTION FOR THE FISCAL YEAR
ENDING SEPTEMBER 30, 2023

July 14, 2022

Board of Trustees
City of Delray Beach General
Employees' Retirement Plan
Delray Beach, Florida

Re: Actuarial Valuation as of October 1, 2021

Dear Board Members:

The results of the October 1, 2021 Annual Actuarial Valuation of the City of Delray Beach General Employees' Retirement Plan are presented in this report.

The computed contribution rate shown on page 1 may be considered as a minimum contribution rate that complies with the Board's funding policy. Users of this report should be aware that contributions made at that rate do not guarantee benefit security. Given the importance of benefit security to any retirement system, we suggest that contributions to the System in excess of those presented in this report be considered.

This report was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The purposes of the valuation are to measure the System's funding progress, to determine the employer contribution rate for the fiscal year ending September 30, 2023, and to determine the actuarial information for GASB Statement No. 67 and No. 68 for the fiscal year ending September 30, 2021. This report also includes estimated GASB Statement 67 information for the fiscal year ending September 30, 2022. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results, associated with the benefits described in this report, for purposes other than those identified above may be significantly different.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section B of this report. This report includes risk metrics in Section A but does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment.

The findings in this report are based on data or other information through September 30, 2021. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such measurements.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

The valuation was based upon information furnished by the Plan Administrator and City concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the Plan Administrator and City.

This report was prepared using certain assumptions approved by the Board as authorized under Florida Statutes and prescribed by the Florida Statutes as described in the section of this report entitled Actuarial Assumptions and Methods. The investment return assumption was prescribed by the Board and the assumed mortality rates detailed in the Actuarial Assumptions and Methods section were prescribed by the Florida Statutes in accordance with Chapter 112.63, Florida Statutes. All actuarial assumptions used in this report are reasonable for purposes of this valuation.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes.

Jeffrey Amrose and Trisha Amrose are members of the American Academy of Actuaries. These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein.

The signing actuaries are independent of the plan sponsor.

This actuarial valuation and/or cost determination was prepared and completed by us or under our direct supervision, and we acknowledge responsibility for the results. To the best of our knowledge, the results are complete and accurate. In our opinion, the techniques and assumptions used are reasonable, meet the requirements and intent of Part VII, Chapter 112, Florida Statutes, and are based on generally accepted actuarial principles and practices. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.

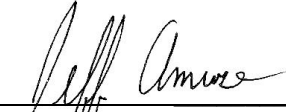

Gabriel, Roeder, Smith & Company will be pleased to review this valuation and Report with the Board of Trustees and to answer any questions pertaining to the valuation.

Respectfully submitted,

GABRIEL, ROEDER, SMITH & COMPANY

DISCUSSION OF VALUATION RESULTS

DISCUSSION OF VALUATION RESULTS

Comparison of Required Employer Contributions

The required employer contribution developed in this year's valuation is compared below to last year's results:

	For FYE 9/30/2023 Based on 10/1/2021 Valuation	For FYE 9/30/2022 Based on 10/1/2020 Valuation	Increase (Decrease)
Required Employer Contribution			
If Paid on October 1			
Date of Payment	10/1/2022	10/1/2021	
Dollar Amount	\$ 2,357,598	\$ 2,882,706	\$ (525,108)
As % of Covered Payroll	9.92 %	12.61 %	(2.69) %
If Paid on December 31			
Date of Payment	12/31/2022	12/31/2021	
Dollar Amount	\$ 2,396,413	\$ 2,930,166	\$ (533,753)
As % of Covered Payroll	10.08 %	12.82 %	(2.74) %

This Report reflects an employer contribution of \$2,882,706 paid in October, 2021 for the fiscal year ending September 30, 2022. The required contribution was \$2,882,706 as determined in the October 1, 2020 Actuarial Valuation Report.

Revisions in Benefits

There were no revisions in benefits since the previous valuation.

Revisions in Actuarial Assumptions or Methods

There were no revisions in actuarial assumptions or methods since the previous valuation.

Actuarial Experience

There has been a net actuarial gain of \$6,791,105 for the year, which means that actual experience was more favorable than expected. The actuarial gain is primarily due a recognized return on the actuarial value of assets of 11.5% compared to the assumed rate of 6.75%. The net gain caused the required employer contribution to decrease by approximately \$580,000 or 2.44% of covered payroll.

Funded Ratio

The funded ratio, one measure of the Plan's financial health, is equal to the actuarial value of assets divided by the actuarial accrued (past service) liability. The funded ratio this year is 101.0% compared to 96.2% last year.

Analysis of Change in Employer Contribution

The components of change in the required contribution as a percent of payroll are as follows:

Contribution rate last year*	12.82 %
Changes in Assumptions	0.00
Experience gain/loss	(2.44)
Change in Normal Cost rate	0.01
Amortization payment on UAAL	(0.16)
Change in administrative expense	<u>(0.15)</u>
Contribution rate this year*	10.08

* Assuming the contribution is paid on December 31.

Components of Required City Contribution

The required City contribution for the fiscal year ending September 30, 2023 is \$2,357,598 assuming the full payment is made on October 1, 2022. Below is a breakdown of this required contribution amount from last year and this year reflecting an October 1 payment date.

	For FYE 9/30/2023 Based on 10/1/2021 Valuation	For FYE 9/30/2022 Based on 10/1/2020 Valuation	Increase (Decrease)
Employer Normal Cost	2,357,598	2,297,539	60,059
Amortization Payments on UAAL due to:			
Prior experience gains and losses	0	(301,498)	301,498
Changes in assumptions	0	606,676	(606,676)
Change in Salary increase assumption	0	(171,760)	171,760
Change in Funding Method	0	450,846	(450,846)
Creating Tiered benefit structure	0	0	0
Plan Amendment - Prior ERIP's	0	0	0
Plan Amendment - 0% Ee Contributions at 30 YOS	0	903	(903)
Total Required Contribution	2,357,598	2,882,706	(525,108)

Variability of Future Contribution Rates

The Actuarial Cost Method used to determine the contribution rate is intended to produce contribution rates which are generally level as a percent of payroll. Even so, when experience differs from the assumptions, as it often does, the employer's contribution rate can vary significantly from year-to-year. Over time, if the year-to-year gains and losses offset each other, the contribution rate would be expected to return to the current level, but this does not always happen.

The Market Value of Assets exceeds the Actuarial Value of Assets by \$25,775,534 as of the valuation date (see Section C). This difference represents deferred investment gains and will serve as an offset to adverse experience in future years.

Estimated Required City Contribution for FYE 2024

The estimated required employer contribution for FYE 2024 is compared to the required employer contribution for FYE 2023 reflecting a December 31 payment date:

	Estimated Required Employer Contribution for FYE 9/30/2024	For FYE 9/30/2023 Based on 10/1/2021 Valuation	Increase (Decrease)
Required Employer Contribution			
Date of Payment	12/31/2023	12/31/2022	
Dollar Amount	\$ 2,470,000 ^{1, 2}	\$ 2,396,413	\$ 73,587
As % of Covered Payroll	10.08 % ^{1, 2}	10.08 %	0.00 %

¹ Estimated Required Employer Contribution for FYE 2024 assuming no gains, losses, or assumption changes and a 3% increase in total covered payroll for FYE 2022.

² For each new hire and vacancy that is added after the valuation date, the Required Employer Contribution will increase by approximately 10% of their covered payroll.

Relationship to Market Value

If Market Value had been the basis for the valuation, the City contribution rate would have remained the same and the funded ratio would have been 118.4%.

Conclusion

The remainder of this Report includes detailed actuarial valuation results, information relating to the pension fund, financial accounting information, employee data and a summary of plan provisions.

RISKS ASSOCIATED WITH MEASURING THE ACCRUED LIABILITY AND ACTUARIALLY DETERMINED CONTRIBUTION

The determination of the accrued liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the Plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns;
2. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
3. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
4. Longevity risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed;
5. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The computed contribution rate shown on page 1 may be considered as a minimum contribution rate that complies with the Board's funding policy. The timely receipt of the actuarially determined contributions is critical to support the financial health of the plan. Users of this report should be aware that contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

PLAN MATURITY MEASURES

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	2021	2020
Ratio of the market value of assets to total payroll	7.39	6.28
Ratio of actuarial accrued liability to payroll	6.24	6.30
Ratio of actives to retirees and beneficiaries	1.18	1.18
Ratio of net cash flow to market value of assets	(2.5) %	(2.8) %

RATIO OF MARKET VALUE OF ASSETS TO PAYROLL

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 2.0 times the payroll, a return on assets 5% different than assumed would equal 10% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll.

RATIO OF ACTUARIAL ACCRUED LIABILITY TO PAYROLL

The relationship between actuarial accrued liability and payroll is a useful indicator of the potential volatility of contributions for a fully funded plan. A funding policy that targets a funded ratio of 100% is expected to result in the ratio of assets to payroll and the ratio of liability to payroll converging over time.

The ratio of liability to payroll may also be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 2.5 times the payroll, a change in liability 2% other than assumed would equal 5% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll.

RATIO OF ACTIVES TO RETIREES AND BENEFICIARIES

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0.

RATIO OF NET CASH FLOW TO MARKET VALUE OF ASSETS

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

ADDITIONAL RISK ASSESSMENT

Additional risk assessment is outside the scope of the annual actuarial valuation. Additional assessment may include scenario tests, sensitivity tests, stochastic modeling, stress tests, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

Original UAAL				Current UAAL				
Years	Source	Amort. Period (Years)	Amount	Years	Amount	10/1/2021 Payment	Estimated 10/1/2022 Payment	Estimated 10/1/2023 Payment
10/1/2021	Combine and Offset UAAL	22	\$ (1,495,004)	22	\$ (1,495,004)	\$ (123,998)	\$ (123,998)	\$ (123,998)
			<u>\$ (1,495,004)</u>		<u>\$ (1,495,004)</u>	<u>\$ (123,998)</u>	<u>\$ (123,998)</u>	<u>\$ (123,998)</u>

The UAAL is being liquidated as a level dollar amount over the number of years remaining in the amortization period. The expected amortization schedule is as follows:

Amortization Schedule					
Year	Expected UAAL	UAAL Payment	Year	Expected UAAL	UAAL Payment
2021	\$ (1,495,004)	\$ (123,998)	2034	\$ (871,654)	\$ (123,998)
2022	(1,463,551)	(123,998)	2035	(798,123)	(123,998)
2023	(1,429,973)	(123,998)	2036	(719,629)	(123,998)
2024	(1,394,128)	(123,998)	2037	(635,836)	(123,998)
2025	(1,355,864)	(123,998)	2038	(546,387)	(123,998)
2026	(1,315,017)	(123,998)	2039	(450,900)	(123,998)
2027	(1,271,413)	(123,998)	2040	(348,968)	(123,998)
2028	(1,224,865)	(123,998)	2041	(240,155)	(123,998)
2029	(1,175,176)	(123,998)	2042	(123,998)	(123,998)
2030	(1,122,132)	(123,998)	2043	-	-
2031	(1,065,508)	(123,998)	2044	-	-
2032	(1,005,062)	(123,998)	2045	-	-
2033	(940,536)	(123,998)	2046	-	-

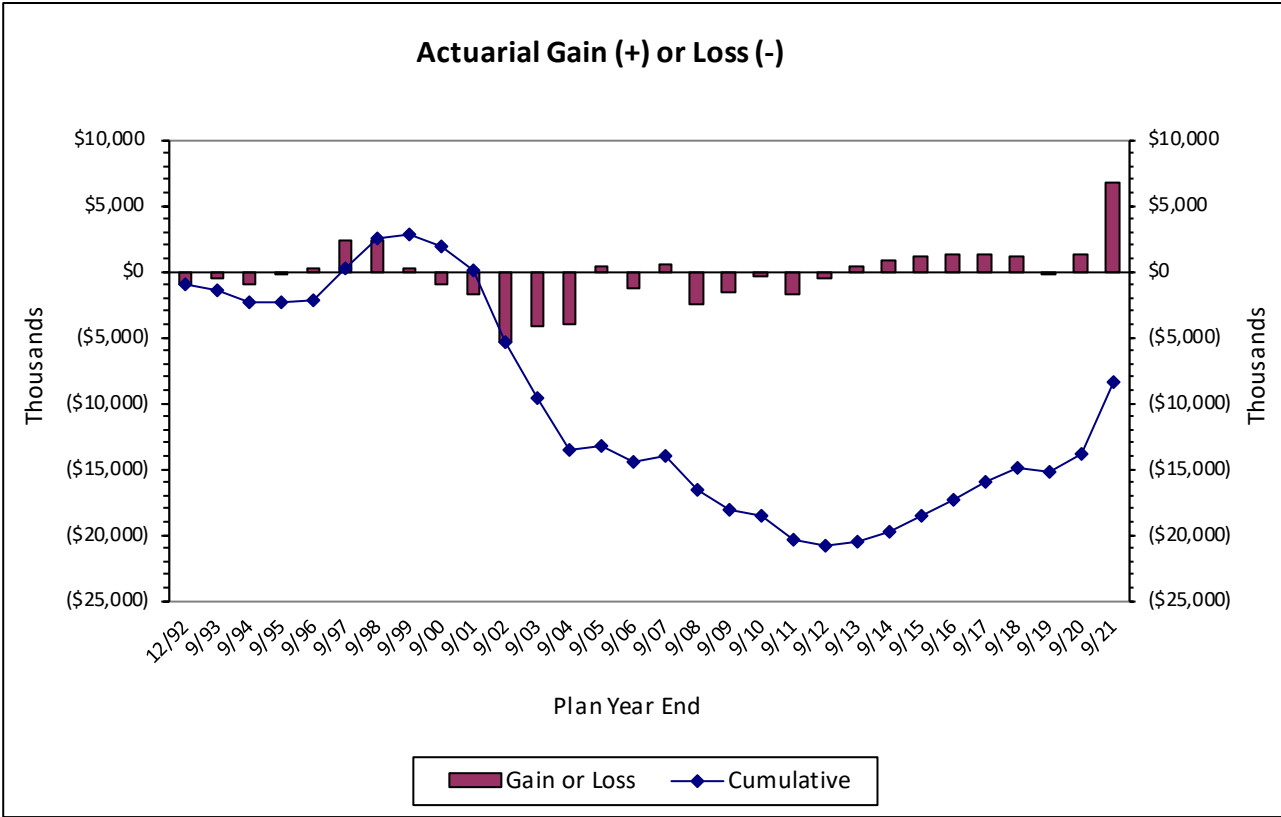

ACTUARIAL GAINS AND LOSSES

The assumptions used to anticipate mortality, employment turnover, investment income, expenses, salary increases, and other factors have been based on long range trends and expectations. Actual experience can vary from these expectations. The variance is measured by the gain and loss for the period involved. If significant long term experience reveals consistent deviation from what has been expected and that deviation is expected to continue, the assumptions should be modified. The net actuarial gain (loss) for the past year is computed as follows:

1. Last Year's UAAL	\$ 5,509,384
2. Last Year's Employer Normal Cost	2,152,262
3. Last Year's Contributions	2,882,706
4. Interest at the Assumed Rate on:	
a. 1 and 2 for one year	517,161
b. 3 from dates paid	0
c. a - b	517,161
5. This Year's Expected UAAL Prior to Revision: 1 + 2 - 3 + 4c	5,296,101
6. Change in UAAL Due to Plan Amendments and/or Changes in Actuarial Assumptions	0
7. This Year's Expected UAAL (after changes): 5 + 6	5,296,101
8. This Year's Actual UAAL (after changes)	(1,495,004)
9. Net Actuarial Gain/(Loss): 7 - 8	6,791,105
10. Gain/(Loss) Due to Investment	6,443,883
11. Gain/(Loss) Due to Other Sources	347,222

Net actuarial gains in previous years have been as follows:

Year Ended	Gain (Loss)
12/31/92	\$ (939,614)
9/30/93	(492,398)
9/30/94	(937,094)
9/30/95	(32,368)
9/30/96	260,299
9/30/97	2,354,556
9/30/98	2,333,750
9/30/99	246,466
9/30/00	(955,923)
9/30/01	(1,750,230)
9/30/02	(5,428,126)
9/30/03	(4,212,406)
9/30/04	(3,989,929)
9/30/05	351,084
9/30/06	(1,334,136)
9/30/07	563,904
9/30/08	(2,574,633)
9/30/09	(1,599,294)

9/30/13	373,386
9/30/14	769,762
9/30/15	1,180,685
9/30/16	1,268,865
9/30/17	450,190
9/30/18	1,080,810
9/30/19	(233,575)
9/30/20	1,353,764
9/30/21	6,791,105

The fund earnings and salary increase assumptions have considerable impact on the cost of the Plan so it is important that they are in line with the actual experience. The following table shows the actual fund earnings and salary increase rates compared to the assumed rates for the last few years.

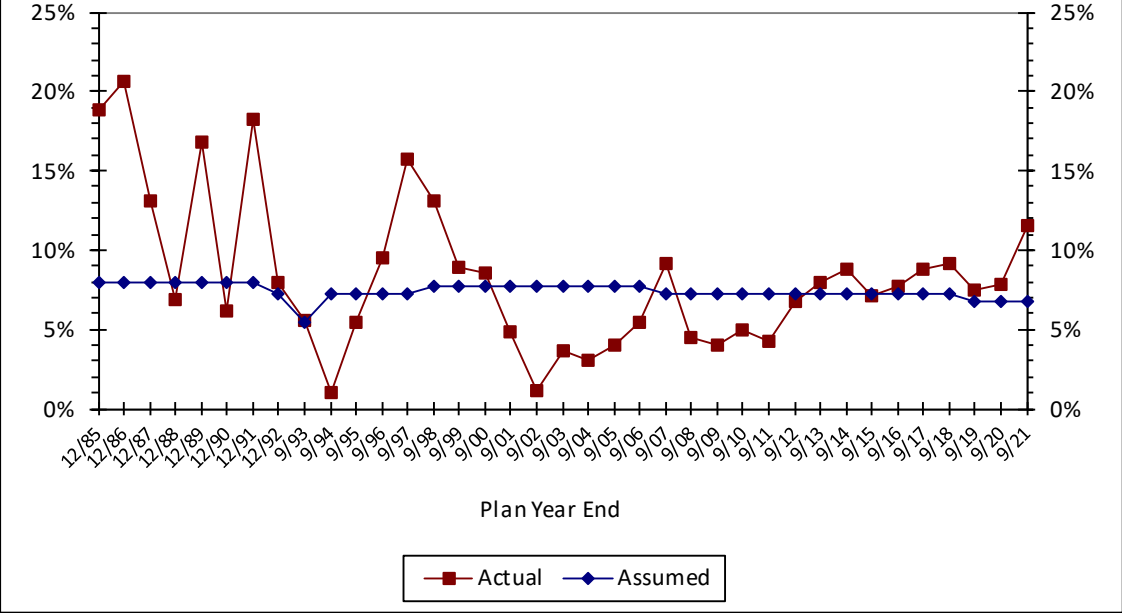

Year Ending	Investment Return		Salary Increases	
	Actual	Assumed	Actual	Assumed
12/31/1985	18.8 %	8.0 %	5.6 %	7.0 %
12/31/1986	20.6	8.0	9.7	7.0
12/31/1987	13.1	8.0	11.4	7.0
12/31/1988	6.9	8.0	4.6	7.0
12/31/1989	16.8	8.0	9.0	7.0
12/31/1990	6.2	8.0	9.7	7.0
12/31/1991	18.2	8.0	4.6	7.0
12/31/1992	7.9	7.25	5.9	5.0
9/30/1993 (9 mos.)	5.6	5.4	3.8	3.8

9/30/2020	7.8	6.75	5.1	5.1
9/30/2021	11.5	6.75	5.1	5.1
Averages	8.3 %	---	5.1 %	---

Note: Figures prior to 1990 were determined by the Wyatt Company.

The actual investment return rates shown above are based on the actuarial value of assets. The actual salary increase rates shown above are the increases received by those active members who were included in the actuarial valuations both at the beginning and the end of each year.

ACTUARIAL ASSUMPTIONS AND COST METHOD

Valuation Methods

Actuarial Cost Method - Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an **Individual Entry-Age Actuarial Cost Method** having the following characteristics:

- (i) the annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains/(losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

Financing of Unfunded Actuarial Accrued Liabilities - Unfunded Actuarial Accrued Liabilities (full funding credit if assets exceed liabilities) were amortized by level (principal & interest combined) dollar contributions over a reasonable period of future years.

Actuarial Value of Assets - The Actuarial Value of Assets phase in the difference between the expected actuarial value and actual market value of assets at the rate of 20% per year. The Actuarial Value of Assets will be further adjusted to the extent necessary to fall within the corridor whose lower limit is 80% of the Market Value of plan assets and whose upper limit is 120% of the Market Value of plan assets. During periods when investment performance exceeds the assumed rate, Actuarial Value of Assets will tend to be less than Market Value. During periods when investment performance is less than assumed rate, Actuarial Value of Assets will tend to be greater than Market Value.

Valuation Assumptions

The actuarial assumptions used in the valuation are shown in this Section. Both the economic and decrement assumptions were established following the Experience Investigation for the Eight Years Ended September 30, 2018, dated June 12, 2019. The mortality assumption is mandated by Chapter 112.63, Florida Statutes.

Economic Assumptions

The investment return rate assumed in the valuations is 6.75% per year, compounded annually (net after investment expense).

The **Inflation Rate** assumed in this valuation was 2.50% per year. The Inflation Rate is defined to be the expected long-term rate of increases in the prices of goods and services.

The assumed **real rate of return** over inflation is defined to be the portion of total investment return that is more than the assumed inflation rate. Considering other economic assumptions, the 6.75% investment return rate translates to an assumed real rate of return over inflation of 4.25%.

Pay increase assumptions for individual active members are shown below. Part of the assumption for each age is for merit and/or seniority increase, and the other 2.50% recognizes wage inflation, including price inflation, productivity increases, and other macroeconomic forces.

The rates of salary increase used for individual members are in accordance with the following table. This assumption is used to project a member's current salary to the salaries upon which benefits will be based.

Years of Service	% Increase in Salary		
	Merit and Seniority	Base (Economic)	Total Increase
1	4.25%	2.50%	6.75%
2	4.25%	2.50%	6.75%
3	3.25%	2.50%	5.75%
4	3.25%	2.50%	5.75%
5 - 14	2.50%	2.50%	5.00%
15 - 19	2.00%	2.50%	4.50%
20 and higher	1.25%	2.50%	3.75%

Demographic Assumptions

The mortality table for General Employees is the PUB-2010 Headcount Weighted Below Median Employee Male Table (pre-retirement), the PUB-2010 Headcount Weighted Below Median Employee Female Table (pre-retirement), the PUB-2010 Headcount Weighted Below Median Healthy Retiree Male Table (post-retirement) and the PUB-2010 Headcount Weighted Below Median Retiree Female Table (post-retirement). These tables use ages set back one year for males and future improvements in mortality projected to all future years after 2010 using scale MP 2018. These are the same rates used for Regular Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2021.

FRS Healthy Post-Retirement Mortality for Regular Class Members

Sample Attained Ages (in 2021)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.19 %	0.58 %	33.14	36.95
55	0.96	0.58	28.77	32.50
60	1.14	0.60	24.68	27.96
65	1.29	0.69	20.63	23.39
70	1.80	1.09	16.62	18.91
75	2.86	1.89	12.91	14.73
80	4.83	3.41	9.63	10.98

FRS Healthy Pre-Retirement Mortality for Regular Class Members

Sample Attained Ages (in 2021)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.19 %	0.11 %	37.72	40.26
55	0.30	0.17	32.71	35.14
60	0.46	0.26	27.85	30.11
65	0.65	0.37	23.17	25.19
70	0.90	0.56	18.62	20.37
75	1.35	0.93	14.19	15.68
80	2.13	1.58	9.89	11.17

For disabled retirees, the mortality table used was the PUB-2010 Headcount-Weighted General Disabled Retiree Tables with ages set forward 3 years for males and females.

FRS Healthy Disabled Mortality for Regular Class Members

Sample Attained Ages	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	2.02 %	1.64 %	20.99	23.92
55	2.53	1.91	18.18	20.88
60	3.08	2.27	15.50	17.88
65	3.93	2.83	12.94	14.91
70	5.08	3.79	10.53	12.07
75	6.98	5.46	8.29	9.45
80	10.12	8.31	6.33	7.19

The rates of retirement used to measure the probability of eligible members retiring during the next year were as follows:

Early Retirement

Age	Service	Rates
0 - 54	20 +	4.0%
55 - 59	All	7.5%

**Normal Retirement for Members
Within Ten Years of Age 60 or 30 Years
of Service as of October 5, 2010**

Age	Years of Service	Rates
0 - 59	30	80.0%
0 - 59	31+	25.0%
60	All	70.0%
61 - 62	All	25.0%
63 - 64	All	45.0%
65	All	85.0%
66 - 69	All	55.0%
70+	All	100.0%

**Normal Retirement for Other Members
Hired Before October 5, 2010**

Age	Years of Service	Rates
0 - 61	30	80.0%
0 - 61	31+	25.0%
62	All	70.0%
63 - 64	All	25.0%
65 - 66	All	45.0%
67	All	85.0%
68 - 69	All	55.0%
70 +	All	100.0%

**Normal Retirement for Other Members
Hired After October 5, 2010**

Age	Rates
65	70.0%
66 - 67	25.0%
68 - 69	45.0%
70+	100.0%

Rates of disability among active members (20% of future disability retirements are assumed to be service-connected):

Sample Ages	% Becoming Disabled within Next Year
0 - 24	0.20 %
25 - 29	0.18
30 - 34	0.18
35 - 39	0.20
40 - 44	0.24
45 - 49	0.27
50 - 54	0.33
55 - 59	0.45

Rates of separation from active membership were as shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members remaining in employment.

Sample Ages	Years of Service	% of Active Members Separating Within Next Year
ALL	0	15.0 %
	1	15.0
	2	14.5
	3	10.5
	4	9.0
20	5 and over	9.0
25		9.0
30		9.0
35		9.0
40		5.5
45		4.8
50		4.0
55		4.0
60		3.5

Changes Since Prior Valuation

None

Miscellaneous and Technical Assumptions

<i>Administrative & Investment Expenses</i>	The investment return assumption is intended to be the return before considering investment expenses. Annual administrative and investment expenses are assumed to be equal to the average of the expenses over the previous 2 years. Assumed administrative and investment expenses are added to the Normal Cost.
<i>Benefit Service</i>	Exact fractional service is used to determine the amount of benefit payable.
<i>Decrement Operation</i>	Disability and mortality decrements operate during retirement eligibility.
<i>Decrement Timing</i>	Decrements of all types are assumed to occur at the beginning of the year.
<i>Eligibility Testing</i>	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
<i>Forfeitures</i>	For vested separations from service, it is assumed that 0% of members separating will withdraw their contributions and forfeit an employer financed benefit. It was further assumed that the liability at termination is the greater of the vested deferred benefit (if any) or the member's accumulated contributions.
<i>Incidence of Contributions</i>	Employer contributions are assumed to be made in one payment at the end of December. Member contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
<i>Marriage Assumption</i>	100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.
<i>Normal Form of Benefit</i>	Life Annuity. For married participants within ten years of attaining age 60 or 30 years of service as of October 5, 2010, a monthly income payable for life of member; upon death of member, 100% of member's benefit payable to spouse for one year and 60% thereafter until death or remarriage of spouse. Other optional forms are also available.
<i>Pay Increase Timing</i>	End of fiscal year. This is equivalent to assuming that reported pays represent the rate of pay on the valuation date.
<i>Service Credit Accruals</i>	It is assumed that members accrue one year of service credit per year.

GLOSSARY

<i>Actuarial Accrued Liability (AAL)</i>	The difference between the Actuarial Present Value of Future Benefits, and the Actuarial Present Value of Future Normal Costs.
<i>Actuarial Assumptions</i>	Assumptions about future plan experience that affect costs or liabilities, such as: mortality, withdrawal, disablement, and retirement; future increases in salary; future rates of investment earnings; future investment and administrative expenses; characteristics of members not specified in the data, such as marital status; characteristics of future members; future elections made by members; and other items.
<i>Actuarial Cost Method</i>	A procedure for allocating the Actuarial Present Value of Future Benefits between the Actuarial Present Value of Future Normal Costs and the Actuarial Accrued Liability.
<i>Actuarially Determined Employer Contribution (ADEC)</i>	The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation. The ADEC consists of the Employer Normal Cost and Amortization Payment.
<i>Actuarial Equivalent</i>	Of equal Actuarial Present Value, determined as of a given date and based on a given set of Actuarial Assumptions.
<i>Actuarial Present Value (APV)</i>	The amount of funds required to provide a payment or series of payments in the future. It is determined by discounting the future payments with an assumed interest rate and with the assumed probability each payment will be made.
<i>Actuarial Present Value of Future Benefits (APVFB)</i>	The Actuarial Present Value of amounts which are expected to be paid at various future times to active members, retired members, beneficiaries receiving benefits, and inactive, nonretired members entitled to either a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
<i>Actuarial Valuation</i>	The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial Valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB No. 67.

<i>Actuarial Value of Assets</i>	The value of the assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets or a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the actuarially determined employer contribution (ADEC).
<i>Amortization Method</i>	A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization Payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the rate at which total covered payroll of all active members is assumed to increase.
<i>Amortization Payment</i>	That portion of the plan contribution or ADEC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
<i>Amortization Period</i>	The period used in calculating the Amortization Payment.
<i>Closed Amortization Period</i>	A specific number of years that is reduced by one each year, and declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc.
<i>Employer Normal Cost</i>	The portion of the Normal Cost to be paid by the employer. This is equal to the Normal Cost less expected member contributions.
<i>Equivalent Single Amortization Period</i>	For plans that do not establish separate amortization bases (separate components of the UAAL), this is the same as the Amortization Period. For plans that do establish separate amortization bases, this is the period over which the UAAL would be amortized if all amortization bases were combined upon the current UAAL payment.
<i>Experience Gain/Loss</i>	A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two actuarial valuations. To the extent that actual experience differs from that assumed, Unfunded Actuarial Accrued Liabilities emerge which may be larger or smaller than projected. Gains are due to favorable experience, e.g., the assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as

projected by the actuarial assumptions. On the other hand, losses are the result of unfavorable experience, i.e., actual results that produce Unfunded Actuarial Accrued Liabilities which are larger than projected.

Funded Ratio

The ratio of the Actuarial Value of Assets to the Actuarial Accrued Liability.

GASB

Governmental Accounting Standards Board.

***GASB No. 67 and
GASB No. 68***

These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 68 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 67 sets the rules for the systems themselves.

Normal Cost

The annual cost assigned, under the Actuarial Cost Method, to the current plan year.

Open Amortization Period

An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.

***Unfunded Actuarial
Accrued Liability***

The difference between the Actuarial Accrued Liability and Actuarial Value of Assets.

Valuation Date

The date as of which the Actuarial Present Value of Future Benefits are determined. The benefits expected to be paid in the future are discounted to this date.

* Net of investment expenses after 2005.

The above rates are based on the retirement system's financial information reported to the actuary. They may differ from figures that the investment consultant reports, in part because of differences in the handling of administrative and investment expenses, and in part because of differences in the handling of cash flows.

NOTES TO SCHEDULE OF THE EMPLOYER'S NET PENSION LIABILITY GASB Statement No. 67

Valuation Date: October 1, 2021
Measurement Date: September 30, 2022
Roll Forward Procedures: The Total Pension Liability was developed by using standard actuarial techniques to roll forward amounts from the October 1, 2021 actuarial valuation one year to the measurement date.

Methods and Assumptions Used to Determine Net Pension Liability:

Actuarial Cost Method	Entry Age Normal
Inflation	2.5%
Salary Increases	3.75% - 6.75% based on service, including inflation
Investment Rate of Return	6.75%
Retirement Age	Experience-based table of rates
Mortality	PUB-2010 Headcount Weighted Below Median Employee Male Table (pre-retirement), the PUB-2010 Headcount Weighted Below Median Employee Female Table (pre-retirement), the PUB-2010 Headcount Weighted Below Median Healthy Retiree Male Table (post-retirement) and the PUB-2010 Headcount Weighted Below Median Retiree Female Table (post-retirement). These tables use ages set back one year for males and future improvements in mortality projected to all future years after 2010 using scale MP 2018. These are the same rates used for Regular Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2020.

Other Information:
Notes See Discussion of Valuation Results in the October 1, 2021 Actuarial Valuation Report.

NOTES TO SCHEDULE OF CONTRIBUTIONS

GASB Statement No. 67

Valuation Date: October 1, 2020

Notes Actuarially determined contributions are calculated as of October 1, which is two years prior to the end of the fiscal year in which contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar, Closed
Remaining Amortization Period	25 years
Asset Valuation Method	5-year smoothed market
Inflation	2.5%
Salary Increases	3.75% - 6.75% based on service, including inflation
Investment Rate of Return	6.75%
Retirement Age	Experience-based table of rates
Mortality	PUB-2010 Headcount Weighted Below Median Employee Male Table (pre-retirement), the PUB-2010 Headcount Weighted Below Median Employee Female Table (pre-retirement), the PUB-2010 Headcount Weighted Below Median Healthy Retiree Male Table (post-retirement) and the PUB-2010 Headcount Weighted Below Median Retiree Female Table (post-retirement). These tables use ages set back one year for males and future improvements in mortality projected to all future years after 2010 using scale MP 2018. These are the same rates used for Regular Class members of the Florida Retirement System (FRS) in their actuarial valuation as of July 1, 2020.

Other Information:

Notes See Discussion of Valuation Results from the October 1, 2020 Actuarial Valuation Report.

SINGLE DISCOUNT RATE GASB Statement No. 67

A single discount rate of 6.75% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 6.75%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between the total actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments (6.75%) was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 6.75%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption for September 30, 2021 Reporting Date

1% Decrease	Current Single Discount Rate Assumption	1% Increase
5.75%	6.75%	7.75%
\$ (6,792,111)	\$ (24,249,185)	\$ (38,651,020)

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption for September 30, 2022 Reporting Date*

1% Decrease	Current Single Discount Rate Assumption	1% Increase
5.75%	6.75%	7.75%
\$ (8,936,275)	\$ (26,720,948)	\$ (41,632,108)

* These figures are estimates only. Actual figures will be provided after the end of the fiscal year.

SECTION F

SUMMARY OF PLAN PROVISIONS

City of Delray Beach

General Employees' Retirement Plan

SUMMARY OF PLAN PROVISIONS

A. Ordinances

The Plan was established under the Code of Ordinances for the City of Delray Beach, Florida, Title 3, Chapter 35, Sections 35.085-35.110 and was most recently amended under Ordinance No. 30-15 passed and adopted on its second reading on November 17, 2015. The Plan is also governed by certain provisions of Part VII, Chapter 112, Florida Statutes (F.S.) and the Internal Revenue Code.

B. Effective Date

January 1, 1965; restated April 22, 1974

C. Plan Year

October 1 through September 30

D. Type of Plan

Qualified, governmental defined benefit retirement plan; for GASB purposes it is a single employer plan.

E. Eligibility Requirements

Full-time employees who are not police officers or firefighters are eligible upon completion of one year of service. City commissioners may not be included.

F. Credited Service

Service is measured as the period of continuous employment, expressed in years and tenths of a year, as a general employee from the employee's most recent date of hire to the date of termination. Credited service includes all periods of paid leave and all periods of unpaid leave up to a maximum of 30 days except as required by the Uniformed Services Employment and Reemployment Rights Act of 1994.

In the event that a member of this plan also has credited service with the City as a police officer or firefighter subsequent to membership in this plan, then such other credited service shall be used in determining vesting and eligibility for normal retirement. Such other credited service will not be considered in determining benefits under this system.

G. Compensation

Basic compensation paid to a participant for services rendered to the City excluding overtime, commissions, bonuses, expenses allowances and any other extraordinary compensation.

H. Final Monthly Compensation (FMC)

For members hired on or before October 5, 2010, the average of the highest 36 consecutive months of Compensation out of the last 120 months of Credited Service immediately preceding retirement or termination; the FMC will not be less than the 24-month average of Compensation as of October 5, 2010. For members hired after October 5, 2010, the average of the highest 60 consecutive months of Compensation out of the last 120 months of Credited Service immediately preceding retirement or termination. Payments for unused leave are not included.

I. Normal Retirement

Eligibility: Members within ten years of attaining age 60 or 30 years of service as of October 5, 2010 may retire on the first day of the month coincident with or next following the earlier of:

- (1) age 60 with 10 years of Credited Service, or
- (2) 30 years of Credited Service regardless of age.

Other members hired on or before October 5, 2010 may retire on the first day of the month coincident with or next following the earlier of:

- (1) age 62 with 10 years of Credited Service, or
- (2) 30 years of Credited Service regardless of age.

Members hired after October 5, 2010 may retire on the first day of the month coincident with or next following attainment of age 65 with 10 years of Credited Service.

Benefit: 2.50% of FMC multiplied by Credited Service with a maximum benefit of 75% of FMC. For members with 10 or more years of Credited Service, the minimum monthly benefit is \$500.

Members may elect to receive a 3% multiplier for future service (and a maximum benefit of 90% of Average Monthly Earnings) by contributing an additional 3.45% of pay. These members may also choose to purchase the 3% multiplier for past service by contributing the full actuarial cost.

Normal Form
of Benefit: Life annuity. For married participants within ten years of attaining age 60 or 30 years of service as of October 5, 2010, a monthly income payable for life of member; upon death of member, 100% of member's benefit payable to spouse for one year and 60% thereafter until death or remarriage of spouse. Other optional forms are also available.

COLA: None

J. Early Retirement

Eligibility: A member may elect to retire earlier than the Normal Retirement Eligibility upon attainment of:

- (1) age 55 with 15 years of Credited Service, or
- (2) 20 years of Credited Service regardless of age.

Benefit: The Normal Retirement Benefit is actuarially reduced by 5% for each year by which the Early Retirement date precedes the Normal Retirement date.

Normal Form
of Benefit: Life annuity. For married participants within ten years of attaining age 60 or 30 years of service as of October 5, 2010, a monthly income payable for life of member; upon death of member, 100% of member's benefit payable to spouse for one year and 60% thereafter until death or remarriage of spouse. Other optional forms are also available.

COLA: None

K. Delayed Retirement

Same as Normal Retirement taking into account compensation earned and service credited until the date of actual retirement.

L. Service Connected Disability

Eligibility: Any member who incurs a total and permanent disability arising out of and in the course of city employment is immediately eligible for a disability benefit.

Benefit: 60% of FMC in effect at date of disability, reduced by amounts payable from Social Security, and in certain cases, by compensation earned from other sources.

Benefit begins 5 months after the date of disability and is payable until the earlier of:

- (a) death
- (b) recovery from disability
- (c) age 65 for those who became disabled prior to age 60 or 5 years after the date of disability for those who became disabled after age 60.

Normal Form: Life annuity

COLA: None

M. Non-Service Connected Disability

Eligibility: Any member who becomes totally and permanently disabled after completing 10 years of Credited Service is immediately eligible for a disability benefit.

Benefit: 2.0% of FMC in effect at date of disability multiplied by Credited Service with a maximum benefit of 50% of FMC. Benefits will be reduced by amounts payable from Social Security, and in certain cases, by compensation earned from other sources.

Benefit begins 5 months after the date of disability and is payable until the earlier of:

- (a) death
- (b) recovery from disability
- (c) age 65 for those who became disabled prior to age 60 or 5 years after the date of disability for those who became disabled after age 60.

Normal Form: Life annuity

COLA: None

N. Death in the Line of Duty

Eligibility: Any member whose death arises out of and in the course of city employment is immediately eligible for a survivor benefit.

Benefit: \$10,000 lump sum, plus a monthly income of 60% of FMC on the date of death payable to the spouse until death or remarriage, or in the case of a non-spouse beneficiary, the actuarial equivalent of the member's lifetime benefit of 60% of FMC payable for life, plus a monthly income of 7 1/2% of the FMC payable to each unmarried child under age 18 (age 22 if full-time student), subject to an overall limitation of 90% of FMC.

Normal Form

of Benefit: Lump sum in addition to monthly benefits payable until death or the remarriage of a spouse. Children's benefits are payable until death, marriage or the attainment of age 18 (age 22 if a full-time student).

COLA: None

O. Other Pre-Retirement Death

Eligibility: Members are eligible for survivor benefits after the completion of 1 or more years of Credited Service.

Benefit: For those with less than 5 years of Credited Service, a \$5,000 lump sum is payable to the spouse or designated beneficiary.

For those with 5 or more years of Credited Service, a \$10,000 lump sum, plus a monthly income paid to the spouse until death or remarriage equal to 65% of the member's Normal Retirement Benefit accrued on the date of death with a minimum equal to 20% of the member's FMC, or in the case of a non-spouse beneficiary, the actuarial equivalent of the member's lifetime benefit of 65% of the member's Normal Retirement Benefit paid for life, plus a monthly income of 7 1/2% of the FMC payable to each unmarried child under age 18 (age 22 if full-time student), subject to an overall limitation of 50% of FMC.

Normal Form

of Benefit: Lump sum in addition to monthly benefits payable until death or the remarriage of a spouse. Children's benefits are payable until death, marriage or the attainment of age 18 (age 22 if a full-time student).

COLA: None

P. Post Retirement Death

Benefit determined by the form of benefit elected upon retirement.

Q. Optional Forms

In lieu of electing the Normal Form of benefit, the optional forms of benefits available to retirees are the 10 Year Certain and Life option or the 50%, 66 2/3%, 75% or 100% Joint and Survivor options. Lump sums may be paid when the monthly benefit is less than \$50.

R. Vested Termination

Eligibility: A member has earned a non-forfeitable right to Plan benefits after the completion of 5 years of Credited Service (See vesting table below).

Benefit: The benefit is the member's accrued Normal Retirement Benefit as of the date of termination. Benefit begins at the Normal Retirement Date.

Normal Form

of Benefit: Life annuity. For married participants within ten years of attaining age 60 or 30 years of service as of October 5, 2010, a monthly income payable for life of member; upon death of member, 100% of member's benefit payable to spouse for one year and 60% thereafter until death or remarriage of spouse. Other optional forms are also available.

COLA: None

Vesting is determined in accordance with the following table.

YEARS OF CREDITED SERVICE	% OF NORMAL RETIREMENT BENEFITS
Less Than 5	None
5	50%
6	60
7	70
8	80
9	90
10 or more	100

S. Non-vested Termination

Eligibility: All members terminating employment with less than 5 years of Credited Service are eligible.

Benefit: Refund of the member's contributions.

T. Member Contributions

3.05%. Those members who elect to receive the 3% multiplier must contribute an additional 3.45%, for a total of 6.50%. Contributions cease upon attainment of 30 years of Credited Service.

U. Employer Contributions

The amount determined by the actuary needed to fund the plan properly according to State laws.

V. Cost of Living Increases

Not Applicable

W. 13th Check

Not Applicable

X. Deferred Retirement Option Plan

Eligibility: Members within ten years of attaining age 60 or 30 years of service as of October 5, 2010 who have met one of the following criteria are eligible for the DROP:

- (1) age 60 with 10 years of Credited Service, or
- (2) 30 years of Credited Service regardless of age.

Other members hired on or before October 5, 2010 who have met one of the following criteria are eligible for the DROP:

- (1) age 62 with 10 years of Credited Service, or
- (2) 30 years of Credited Service regardless of age.

Members hired after October 5, 2010 are eligible for the DROP upon attaining age 65 with 10 years of Credited Service.

Members who meet eligibility must submit a written election to participate in the DROP.

Benefit: The member's Credited Service and FMC are frozen upon entry into the DROP. The monthly retirement benefit as described under Normal Retirement is calculated based upon the frozen Credited Service and FMC.

**Maximum
DROP Period:** 60 months

**Interest
Credited:** The member's DROP account is credited at an interest rate equal to the actual investment return earned by the pension plan or by the member's self directed investments.

**Normal Form
of Benefit:** Lump Sum, or equal quarterly or annual installments spread over a period of time designated by the retiree.

Y. Other Ancillary Benefits

There are no ancillary benefits-retirement type benefits not required by statutes but which might be deemed a City of Delray Beach General Employees' Retirement Plan liability if continued beyond the availability of funding by the current funding source.

Z. Changes from Previous Valuation

See Section A of the report under the Revisions in Benefits section.
