## RECOMMENDED NATIVE PLANT MATERIALS

All Landscape improvements proposed to bring properties into compliance with minimum landscape standards must also conform to the requirements for the installation of native plant materials.

Fifty percent of all new trees installed must be native to South Florida and twenty-five percent of all shrubs and ground covers must be native species. While the following list of native plant material is not by any means an all inclusive list, it includes native species that can be generally found in local plant nurseries:

**TREES:** Trees must be a minimum of 12' in height at installation. When selecting the type of tree, be mindful of overhead utilities and the ground space available for mature trunk development.

<u>Common Name</u>	<u>Botanical Name</u>	<u>Mature Height</u>
LAUREL OAK	Quercus laurifolia	70'
LIVE OAK	Quercus virginiana	60'
MAHOGANY	Swietenia mahagoni	50'
PIGEON PLUM	Coccoloba diversifolia	40'
GREEN BUTTONWOOD	Conocarpus erectus	40'
PITCH APPLE	Clusia rosea	30'
DAHOON HOLLY	Ilex cassine	25'
BLACK IRONWOOD	Krugiodendron ferreum	25'
SILVER BUTTONWOOD	Conocarpus 'sericeus'	20'
STOPPERS	Eugenia spp.	15'
WAX MYRTLE	Myrica cerifera	15'

**SHRUBS:** Shrubs need to be a minimum of 24" in height and 24" on center at installation.

COCOPLUM	Chrysobalanus icaco
SILVER BUTTONWOOD	Conocarpus 'sericeus'
SIMPSON STOPPER	Myricanthes fragrans
WALTER'S VIBURNUM	Viburnum obovatum
MYRSINE	Myrsine guianensis

**GROUND COVERS:** No minimum height, typically spaced at 15" on center.

DWARF YAUPON HOLLY	Ilex vomitoria 'Stokes Dwarf'
DUNE SUNFLOWER	Helianthus debilis
DAYLILY	Hemerocallis spp.
SPIDER LILY	Hymenocallis latifolia
SWORN FERN	Nephrolepis exalta
